Have you ever wondered why you have the body type you have?

Why do some people eat little but gain weight, when some eat a lot yet so slim? In fact, the same amount of calories and physical exercise can have completely different effects on different people. That's why weight management can be so complex.

Let's face it: Most weight loss attempts don't work the first time. That's because many of these weight loss programmes and products on the market are either ineffective or unsustainable. After a good start, results either plateau or decline, resulting in lessened motivation and the inevitable return to unhealthy lifestyle.

BELITE 123, however, is different. Our customers report not only fast and consistent weight loss that lasts, but also a renewed approach to diet and lifestyle that sets them up for good health.

That's why **QNET has** undergone years of research to develop a **deep understanding of each contributing factor to weight gain**. As a result, QNET's **BELITE 123 is made of 3 different formulas that target a different mechanism to solve your weight issue**. Our customers report not only fast and consistent weight loss that lasts, but also a renewed approach to diet and lifestyle that sets them up for good health for life.
